What is ADSA?

What is ADSA?

ADSA stands for **Advanced** Data structures and Algorithms.

This course builds on the concepts introduced in CSEN 301 Data Structures and Algorithms and CSEN 703 Analysis and Design of Algorithms.

Course Structure

The course is taught by the GUC ICPC Community under the supervision of Prof. Slim Abdenadher.

The course consists of 12 lectures and 11 labs, each lecture is followed by a lab except the first one.

Course Content

The course consists of four modules:

1. Data Structures
2. Mathematics
3. Graph Theory
4. String Algorithms

Course Assessment

- 50% take-home assignments (best 9 out of 12)
- 30% quizzes (3 quizzes; no drops)
- 20% in-lab assignments (best 9 out of 11)

The take-home assignments will be evaluated in the following lab.
